**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Rajesh Vallabh on 12/4/03.

2. The application has been amended as follows:  
Claims 25-48 have been canceled.

***Allowable Subject Matter***

3. Claims 1-24 and 48-53 are allowed.

4. The following is an examiner's statement of reasons for allowance:

Applicant has claimed a method of determining the locations of pins in the printhead of a microarray spotting instrument comprised of the following steps: providing a printhead of a microarray spotting instrument, said printhead having a plurality of fluid dispensing pins releasably or movably positionable in a plurality of pin locations in the printhead, providing a pin detection apparatus, and using the pin detection apparatus to detect whether or not a pin is present at its given location for each pin location in the printhead. Applicant has also claimed a microarray spotting

instrument comprised of a printhead with a plurality of fluid dispensing pins movable or releasably mounted in the printhead, a substrate station for holding a substrate, a well station for holding sample material, a positioning mechanism for moving the printhead, a controller for controlling movement of the printhead, and a pin detection apparatus for automatically detecting the absence or presence of the fluid dispensing pins in the printhead. In claim 50, applicant has claimed a method of printing on a substrate using the printhead and then determining whether or not the pin is stuck in a raised position. The Examiner did not find prior art which contained or suggested the method and apparatus of the amended claims. The Examiner considers the previously cited prior art "El-Hage" to be the closest prior art to the instant invention. El-Hage shows an aspirating device with a dispensing part and rod or probe part. The device uses a circuit board to determine when the probe rod is attached to the dispensing part of the device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dwayne K Handy whose telephone number is (703)-305-0211. The examiner can normally be reached on M-F 8:00-4:30.
